broadband infrastructure to high fiber count cable close to residents and businesses in all 123 communities in the service area. This infrastructure will significantly reduce the upfront costs of entry for last mile providers by making available lit and dark fiber enabling them to reach all the un/underserved communities. The MassBroadband 123 solution comprehensively addresses the issues faced by the public safety community by creating a guaranteed-bandwidth public safety network that will interconnect the majority of municipal police, fire and emergency management sites. This upgrade will make interoperability possible, significantly improving public safety responsiveness, coordination and effectiveness. Additionally, the MassBroadband 123 network will dramatically change the economic development dynamic by bringing fiber within 3 miles of 99% of area businesses and directly connecting all the community colleges and most workforce development agencies. The project will bring broadband access to 11 NTIA defined economically distressed areas, and 69 communities designated by the state as Economic Target Areas, and will connect to 128 public housing sites to provide vulnerable residents with an important tool to find and compete for jobs.
